Summary

Software Developer with 2+ years of experience across frontend, backend, and mobile development, building production-grade applications used by real users. Strong experience leveraging AI-assisted engineering tools, including Claude Code, Gemini CLI, and Codex, to accelerate development, debugging, and delivery quality.

Experience

Mobile Application Developer at [Wehda](#)

January 2024 - Present

- Implemented local caching with Realm, saving API calls worth 1,000+ lines of JSON on every app start.
- Built a custom component that scopes re-renders to only the children whose data changed, eliminating unnecessary renders across the app.
- Managed global application state with Redux for predictable, consistent data flow.
- Tested features on real Android and iOS devices using Xcode and Android Studio.
- Migrated the entire codebase from JavaScript to TypeScript, improving type safety and long-term maintainability.

Frontend Developer at [Wehda](#)

January 2025 - Present

- Implemented pixel-perfect responsive UI from Figma designs using Tailwind CSS across mobile, tablet, and desktop.
- Applied standard SEO practices including meta tags, Open Graph, and structured data to improve search ranking.
- Implemented Arabic/English localization with dynamic LTR/RTL layout switching using i18n.
- Fetched data server-side with Remix SSR, delivering seamless page loads with zero visible loaders.

Projects

Wehda Application - App Store • [Link](#)

Wehda Application - Google Play • [Link](#)

A production React Native application featuring complex forms, smooth animations, offline-aware behavior, and REST API integration.

Wehda Website • [Link](#)

Built with Remix SSR for a seamless, loader-free experience and high search ranking through full SEO implementation.

Dynamic Workflow Orchestrator • [GitHub](#)

Full-stack approval system with configurable sequential/parallel pipelines, real-time updates, and RBAC, built with Vue 3 and Laravel 11.

My Portfolio • [Live Demo](#)

Personal portfolio to showcase projects, experience, and technical capabilities.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML, CSS

Frontend: React, Remix, NextJS, Vue.js, Tailwind, Redux, Pinia, React Hook Form, React Native

Backend: Django, NodeJS, Laravel, MySQL, Realm DB

Tools: Xcode, Android Studio, Claude Code, Gemini CLI, Figma, Zeplin, Git / GitHub, Notion, Trello

Education

Bachelor's Degree in Information Technology at Higher Institute for Commercial Sciences, El-Mahalla

January 2021 - January 2025
