+201556968432

Software Developer with over 2 years of experience in full-stack, front-end, back-end, mobile, and deployment projects. Focused on understanding business needs and delivering efficient products that save time and reduce costs.

Experience

Mobile Application Developer at Wehda

January 2024 - Present • [↗](#)

- Implemented local caching with Realm, saving API calls worth 1,000+ lines of JSON on every app start.
- Built a custom component that scopes re-renders to only the children whose data changed, eliminating unnecessary renders across the app.
- Managed global application state with Redux for predictable, consistent data flow.
- Tested features on real Android and iOS devices using Xcode and Android Studio.
- Migrated the entire codebase from JavaScript to TypeScript, improving type safety and long-term maintainability.

Frontend Developer at Wehda

January 2025 - Present • [↗](#)

- Implemented pixel-perfect responsive UI from Figma designs using Tailwind CSS across mobile, tablet, and desktop.
- Applied standard SEO practices including meta tags, Open Graph, and structured data to improve search ranking.
- Implemented Arabic/English localization with dynamic LTR/RTL layout switching using i18n.
- Fetched data server-side with Remix SSR, delivering seamless page loads with zero visible loaders.

Projects

Wehda Application - App Store • [↗](#)

Wehda Application - Google Play • [↗](#)

A cross-platform React Native application with complex form handling, smooth animations, and REST API integration.

Wehda Website • [↗](#)

Built with Remix SSR for a seamless, loader-free experience and high search ranking through full SEO implementation.

Dynamic Workflow Orchestrator • [↗](#)

Full-stack approval system with configurable sequential/parallel pipelines, real-time updates, and RBAC, built with Vue 3 and Laravel 11.

My Portfolio • [↗](#)

Personal portfolio to showcase projects, experience, and technical capabilities.
